At the present time there are "several" amphibious tanks and amphibious "automobiles" in the shop for repairs. Height of the tank is approximately 2.75 m., length approximately 6.00 m. Attached to the track fenders are "air cannisters" which may are also found inside the compartment. A firewall separates the crew, in front, from the motor to the rear. A propeller is attached at the rear. The entire tank is made of it "light weight" material.
